HARSH SHARMA

harshari.github.io • harsh.sharma@wsu.edu

RESEARCH SUMMARY

My general research interests are at the intersection of artificial intelligence (AI) and computing system with a focus on exploiting their synergistic strengths: AI for design and optimization of computing systems, and the design of optimized computing systems for AI applications. The current focus of my research is on AI-driven design and Optimization of *Chiplet-based Systems* for enabling high-performance and low-energy computing for various applications including training/inference of large AI models. Specific topics include:

- Enabling server-scale system design with low-latency interconnect networks.
- Hardware and software co-design to create chiplet systems for training/inference with large AI models including CNNs, GNNs, and Transformers.
- Design of high-performance and energy-efficent manycore systems to overcome Moore's law.
- Design of defect-aware chiplet-based systems to reduce carbon footprint at scale.
- Accelerating the design of robust, reliable, and environmentally sustainable paradigms.

EDUCATION

Ph.D. Candidate, Computer Engineering, 3.93 GPA

2021-Present

Advisors: Partha Pratim Pande & Janardhan Rao Doppa

Washington State University

Pullman, Washington

Bachelor of Engineering, Electronics and Communication Engineering

2017-2021

NSIT, Delhi University
Department ranker (Top 5%)

New Delhi, India

INDUSTRIAL EXPERIENCE

Machine Learning Research Intern

June 2020-December 2020

Lenskart.com

New Delhi, India

Developed AR tools with vision model to boost online sales by 35% during COVID19 Pandemic.

AWARDS AND HONORS

- Harvard Scholar at HPAIR Conference, Kazakhstan. Technology Track (top 1%)
- Best Paper Award at ACM/IEEE Embedded Systems Week Conference, 2023 *
- Best Paper Award at ACM/IEEE Embedded Systems Week Conference, 2022 †
- ACM SIGDA Richard Newton Young Fellowship, 2022

SELECTED PUBLICATIONS

- 1. [Best Paper Award] Harsh Sharma, Lukas Pfromm, Rasit Topaloglu, Janardhan Rao Doppa, Umit Y. Ogras, Ananth Kalyanraman, Partha Pratim Pande. Florets for Chiplets: Data Flowaware High-Performance and Energy-efficient Network-on-Interposer for CNN Inference Tasks. ACM Transactions on Embedded Computing Systems, Hamburg, 2023.
- 2. **Harsh Sharma**, Gaurav Narang, Janardhan Rao Doppa, Partha Pratim Pande. Dataflow aware interconnect-architecture design for DNN-Accelerators End-to-End Transformer Models. *Design Automation and Test in Europe DATE*, Spain, 2024.

SELECTED PROFESSIONAL AND OUTREACH ACTIVITIES

Conference and Invited Talks

- Talk on Accelerating the Future of Electronics and beyond at IISc Bangalore- Jan 2024. ‡
- SWAP: A Server-scale Communication aware Chiplet-based PIM Accelerator at ESWEEK 2022.
- Achieving Datacenter-scale Performance through Chiplet-based Manycore Architectures DATE23.
- Florets for Chiplets: Data Flow-aware High-Performance and Energy-efficient Network-on-Interposer for CNN Inference Tasks at TUHH Hamburg, Germany- 2023.
- Talk on AI-Driven Design and Optimization of Chiplet-based Manycore Systems for Server-Scale Applications at WSU Pullman-2023.
- Talk on AI-Driven Design and Optimization strategies for more Moore at NSIT Delhi (Virtual)-2023.
- Talk on Accelerating the Future of Electronics at Boston University (Virtual)-2023. §

Reviewer

• ESWEEK 2022, ICCAD 2023, DAC 2022, DAC 2023, DATE 2022, AAAI 2023

SKILLS

- Programming Languages. Python, Bash, C/C++, HTML/CSS, LATEX, Java, MATLAB
- Tools/Packages. Git, SQL, PyTorch, TensorFlow, Python data science tools
